

FIRST TUNNELS

FirstTunnels.co.uk

Your one-stop polytunnel shop!

First Tunnels offer everything gardeners require for a top-quality polytunnel

T SHOPPING – WHY can't it just be simple? We're told that the internet can save us time, money and stress. The reality, however, can be a little different.

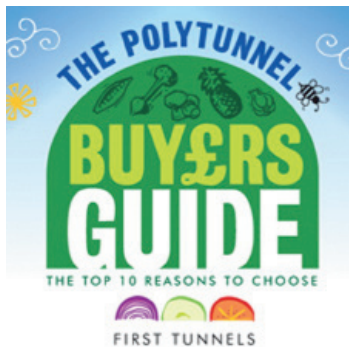

Let's face it, trawling through hundreds of Google searches is a chore. And when you think you've made your mind up, you're bombarded by conflicting opinions on web forums. And let's not even talk about animated meerkats or bellowing opera singers!

Wouldn't it be nice if there was a simple one-stop-shop?

Well, if you're one of the thousands of gardeners looking to invest in a polytunnel or accessories, you're in luck.

First Tunnels, the UK's leading polytunnel supplier, has a comprehensive, easy-to-use website that's packed with help and advice.

The latest addition to the company's website is The Polytunnels Buyers' Guide. In short, it's the ultimate guide to why First Tunnels is the first choice for gardeners across the UK. On this page you'll find a taster, but go to FirstTunnels.co.uk/buyers_guide.asp for an in-depth run-down.

1 – The market leader

Over 20 years, First Tunnels has clocked up a top client list including Alan Titchmarsh, Bob Flowerdew and Hugh Fearnley-Whittingstall. It now sells over 3,000 polytunnels every year!

2 – Super strong covers

First Tunnels' covers are tough, strong and are designed to cope with extremes of UV. They're guaranteed for five years and will often last closer to 10 years.

3 – Timber thickness

The right timber will give strength and rigidity to a polytunnel but will still allow doors to be easy to manoeuvre. First Tunnels' wood is FSC

approved and treated with Tanalith E to ensure a long life.

4 – Door options

The size of a polytunnel dictates whether it can have single or double doors, but the Buyers Guide will help you choose if they should open inwards or out. There's a handy guide to space-saving sliding doors, too.

5 – Steel construction

Polytunnels are often sited in exposed areas, so you need a

structure that's up to the job. All of First Tunnels' products have exactly the right gauge of steel hoop, but there's a higher-spec for extreme conditions.

6 – Construction service

A First Tunnels polytunnel is easy to build and comes with a DVD featuring step-by-step details. There are loads of tips on the firm's Facebook, Twitter, YouTube sites and blog. First Tunnels' experts are just a call away from 9-5 on weekends and bank holidays (☎ 07801 601253). Or there's a team of trained constructors who can take care of the whole job.

7 – Product guides

First Tunnels brought in a film crew to capture the process of building a tunnel – from site preparation to the finishing touches. Its printed manuals are detailed and easy-to-follow.

8 – Ease of ordering

While brochures cover everything you need for a

perfect polytunnel, there's easy online ordering and a calculator to help choose the ideal configuration, as well as every accessory you could require.

9 – Fast delivery

Just because your polytunnel is made to order, you won't be in for a long wait. First Tunnels keeps all parts in stock, so orders are turned around quickly. In fact, most domestic polytunnels are despatched in just five working days – and often quicker during September to December.

10 – The experts' choice

As well as NHS trusts, schools, government organisations and gardening celebs, First Tunnels works closely with the leading polytunnel gardening experts: Mark Gatter, Andy McKee and Paul Peacock. Find out what they think at FirstTunnels.co.uk as well as on the firm's Facebook, Twitter site and blog.

“You can even call the firm's experts at weekends”
